

Section B [30 marks]

You are advised to write between 250 and 350 words for this section.

Question 2

You should look at the printout of a webpage on page 3, study the information carefully and plan your answer before beginning to write.

To prepare graduating students (like you) for a post-secondary education, your school has organised a series of lessons to guide you in choosing the right path after the O level examinations. Your Form Teacher is asking every student to speak in class about their chosen path. You are to share (in detail) an option that you have decided for yourself and explain why you made that choice.

Write a speech to address the class with the following points:

- show an appreciation of the school's efforts
- say which option suits your learning style and needs more
- explain clearly why you think you will personally benefit from this choice.

You may add any other details you think will be helpful.

Write your speech in clear, accurate English. Your tone should be polite and friendly, convincing your teacher and classmates that you have made the best decision for yourself.

You should use your own words as much as possible.
