CATHOLIC HIGH SCHOOL
2021 Preliminary Examination
Secondary 4 (O-Level Programme)

ADDITIONAL MATHEMATICS

4049/02

Paper 2

15 September 2021
2 hours 15 minutes

Additional materials: Answer booklets A, B and C

READ THESE INSTRUCTIONS FIRST

Write your name, register number and class on all the work you hand in.

Write in dark blue or black pen.

You may use a soft pencil for any diagrams or graphs.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO NOT WRITE ON THE MARGINS.

Answer **all** questions.

If working is needed for any question, it must be shown with the answer.

Omission of essential working will result in loss of marks.

The use of an approved scientific calculator is expected, where appropriate.

If the degree of accuracy is not specified in the question, and if the answer is not exact, give the answer to **three significant figures**. Give answers in **degrees to one decimal place**.

For π , use either your calculator value or 3.142, unless the question requires the answer in terms of π .

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

The total of the marks for this paper is **90**.

This document consists of **22** printed pages, including 1 blank page.

[TURN OVER]

Mathematical Formulae**1. ALGEBRA***Quadratic Equation*

For the quadratic equation $ax^2 + bx + c = 0$,

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

Binomial Expansion

$$(a + b)^n = a^n + \binom{n}{1}a^{n-1}b + \binom{n}{2}a^{n-2}b^2 + \dots + \binom{n}{r}a^{n-r}b^r + \dots + b^n,$$

where n is a positive integer and $\binom{n}{r} = \frac{n!}{(n-r)!r!} = \frac{n(n-1)\dots(n-r+1)}{r!}$

2. TRIGONOMETRY*Identities*

$$\sin^2 A + \cos^2 A = 1$$

$$\sec^2 A = 1 + \tan^2 A$$

$$\operatorname{cosec}^2 A = 1 + \cot^2 A$$

$$\sin(A \pm B) = \sin A \cos B \pm \cos A \sin B$$

$$\cos(A \pm B) = \cos A \cos B \mp \sin A \sin B$$

$$\tan(A \pm B) = \frac{\tan A \pm \tan B}{1 \mp \tan A \tan B}$$

$$\sin 2A = 2 \sin A \cos A$$

$$\cos 2A = \cos^2 A - \sin^2 A = 2\cos^2 A - 1 = 1 - 2\sin^2 A$$

$$\tan 2A = \frac{2 \tan A}{1 - \tan^2 A}$$

Formulae for ΔABC

$$\frac{a}{\sin A} = \frac{b}{\sin B} = \frac{c}{\sin C}$$

$$a^2 = b^2 + c^2 - 2bc \cos A$$

$$\Delta = \frac{1}{2}ab \sin C$$

Free Exam Papers

- 1 (a) Solve the simultaneous equations

$$2y - 7x = 5x^2,$$

$$3y = 7 - 4x.$$

[3]

- (b) Given that the line $y = mx + 1$ is a tangent to the curve $y = x^2 + m(2x + 1)$, find the value(s) of the constant m . [3]

- (c) Find the range of values of k such that $x^2 + 4x > kx - 9$.

[3]

- 2 The diagram shows a quadrilateral with vertices $O(0, 0)$, $A(8, -2)$, B and C . The equation of AB is $y = 4x - 34$ and the equation of BC is $5y + 3x = 60$.

tuitionwithjason.sg
Free Exam Papers

- (i) Find the coordinates of B and C .

[3]

(ii) Determine if $OABC$ is a kite.

Give reasons. [2]

(iii) A point D , above the x -axis, is such that OD is parallel to AB and $OD = 5\sqrt{17}$, find the coordinates of D . [4]

(iv) Find the area of the trapezium $OABD$.

[2]

Free Exam Papers

- 3 The diagram shows a structure such that $VA = 3$ m, $AB = 2$ m, $BC = 1.5$ m and angle $AVD = \text{angle } ABF = \theta$ degrees. BF is parallel to CE , D is the midpoint of CE and the structure is symmetrical about VD .

- (i) Show that $VD = 3 \cos \theta + 2 \sin \theta + 1.5$. [1]

- (ii) Express VD in the form $R \cos(\theta - \alpha) + 1.5$, where $R > 0$ and α is acute. [3]

- (iii) State the largest value of VD and find the corresponding value of θ . [2]

- (iv) Find the value(s) of θ for which $VD = 5$ m. [4]

Free Exam Papers

4 (a) Solve the equation $8e^{x+1} = \frac{15}{e^{x-1}} - 14e$.

Give your answer in the form $\ln a$. [4]

(b) Solve the equation $3 \sin 2\theta = \cos \theta$ for $-\pi \leq \theta \leq \pi$.

[4]

tuitionwithjason.sg
Free Exam Papers

- 5 (a) Solve the equation $\log_5 x + 1 = 2\log_x 5$.

Give your answer in the form $\frac{1}{a}b^c$, where a, b and c are integers. [4]

Working space for question 5(a)

(b) Solve the equation $\log_9(2+x) = \log_{16} 4 - \log_{\frac{1}{3}} \sqrt{1-2x}$. [5]

tuitionwithjason.sg
Free Exam Papers

- 6 (i) Show that $\frac{d}{dx} [x\sqrt{3x-1}] = \frac{Ax+B}{\sqrt{3x-1}}$, where A and B are constants. [4]

- (ii) Hence or otherwise, find $\int_1^2 \frac{9x-2}{\sqrt{3x-1}} dx$, giving your answer correct to 3 significant figures. [4]

- 7 The function f is defined for $x \neq -\frac{1}{3}$ and is such that $f''(x) = 4e^{2x} + \frac{9}{(3x+1)^2}$.

Given that $f'(0) = -1$ and $f(0) = 2$, find an expression for $f(x)$. [7]

- 8 (a) The equation of a curve is $y = \frac{1}{\sqrt{10x-1}} + \frac{1}{3}x$, for $x \neq \frac{1}{10}$. Find the equation of the normal to the curve at the point $\left(1, \frac{2}{3}\right)$. [4]

- (b) The diagram shows a cylindrical water tank with base radius 16 cm.

Water is flowing into the tank at a constant rate of $4.8\pi k \text{ cm}^3/\text{min}$, where k is a constant. At time t minutes, the depth of the water in the tank is h metres. There is a hole at point P at the bottom of the tank and a cork is used to stop water leakage. When the cork is unplugged, water will leak from the hole at a rate of $6.4\pi \text{ cm}^3/\text{min}$.

Find an expression for the rate of change of h in terms of k after the cork is unplugged. [4]

- 9 (i) The expansion of $(1+px)^n$, where $n > 0$, by the binomial theorem is $1+36x+66p^2x^2+kx^3+\dots$. Find the value of n , of p and of k . [5]

tuitionwithjason.sg
Free Exam Papers

- (ii) Find the term independent of x in the expansion of $(3+x)\left(2x-\frac{1}{x}\right)^8$. [4]

- 10 The table shows, to 2 decimal places, the population, P , of a certain kind of bacteria in a test-tube, measured at hourly intervals, t .

t	0.2	0.6	0.9	1.3	1.5
P	0.2	0.96	1.40	1.55	178

- (i) On the grid on the next page, plot $\lg P$ against t and draw a straight line graph. [3]

- (ii) Determine which value of P , in the table above, is the incorrect reading.
Use the graph to estimate a value of P to replace the incorrect recording of P . [2]

- (iii) Find the gradient of your straight line and hence express P in the form $\frac{A^t}{10^{2k}}$,
where A and k are constants. [4]

tuitionwithjason.sg
Free Exam Papers

- (iv) On the same diagram, draw the line representing $P^{10} = 10^{3-t}$ and hence estimate the
value of t for which $\left(\frac{A^t}{10^{2k}}\right)^{10} = 10^{3-t}$. [2]

1. The first part of the text discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that this is crucial for ensuring transparency and accountability in the organization's operations.

2. The second part of the text outlines the various methods and tools used to collect and analyze data. It highlights the need for a systematic approach to data collection and the importance of using reliable sources of information.

3. The third part of the text describes the process of interpreting the data and drawing conclusions from it. It stresses the importance of being objective and unbiased in the analysis and the need to consider all relevant factors.

4. The fourth part of the text discusses the importance of communicating the results of the analysis to the relevant stakeholders. It emphasizes that clear and concise communication is essential for ensuring that the findings are understood and acted upon.

5. The fifth part of the text concludes by summarizing the key points of the analysis and providing recommendations for future actions. It stresses the importance of continuous improvement and the need to regularly review and update the organization's processes and procedures.
